Digital Image Plans

We offer three tiers of digital images.

Tier One

Color corrected and adjusted full size jpeg image (specific size can vary based on crop)(original images are 5472x3648 pixels, Canon 1DX Mark II)

Nearly limitless options with the original files.

Non-commercial personal print release.

Single Image \$40

Single player from school season or tournament. \$185

Tier Two

Color corrected and adjusted jpeg image (approximately 2600x1733 pixels)

Great for prints up to 8x10.

Non-commercial personal print release

Single Image \$30

Tier Three

Color corrected, adjusted and cropped jpeg image (650x433 pixels)

Great for web and viewing on your computer. (will make "OK" 4x6 prints)

Non-commercial personal print release

Single Image \$10

It is generally recommended that you have between 250 PPI and 300 PPI (pixels per inch) for "print quality" prints. As you go below these recommended figures you can expect reduced print quality

Each Tier above assumes the use of our current camera gear, the Canon 1DX Mark II. This is subject to change as equipment changes. The Canon 1DX Mark II produces 5472x3648 pixel images, or roughly 20 megapixels.
